Wine Spectator 91 PTS 2015

# TASTING NOTES

Big wines featuring a relatively unknown Tuscan hybrid clone of Cabernet and Merlot, called Caberlot. Bordering on herbaceous in some vintages, still medium bodied and serious.

# Il Carnasciale

# Carnasciale

COUNTRY ABV ltaly 14%

REGION VARIETALS
Tuscany Caberlot

APPELLATION
Toscana IGT

#### WINERY

Podere II Carnasciale is situated in the southern Chianti mountains in the Valdarno di Sopra region of Tuscany, thirty kilometers north of Siena and Arezzo and 60 kilometers south of Florence. True to original owner's (Wolf Rogosky) vision, the secluded hilltop estate is run today by Bettina and her son Moritz Rogosky, in collaboration with the enologists and winemakers Peter Schilling and Marco Maffei.

The Caberlot variety—a naturally occurring crossing of Merlot and Cabernet France—is cultivated exclusively at Podere II Carnasciale, making them a self-proclaimed "haute couture" winery. Extreme care and craft go into detail, precision, and quality, in both their vineyard and cellar work. Their work in the vineyards is carried out entirely by hand, with the utmost respect for the soil and the vines. Pruning, budding, and leaf management are all done manually, without the use of chemical fertilizers, herbicides or pesticides.

# **CULTIVATION**

The variety Caberlot was first identified in the late 1960's in an abandoned vineyard. It is cultivated exclusively at Il Carnasciale with utmost respect for the soil and plants, entirely by hand. Manual harvest usually begins in late September, and the small baskets are cooled until brought to the cellar.

# VINIFICATION

The grapes are destemmed and fermented in small stainless steel vats (8-10hL) with temperatures kept below 28-29° C. The cap formed by the mash is broken twice daily with a wooden cross to increase contact between the skins and the juice. The grapes from each vineyard and each day of harvest are fermented individually, and the use of sulfates is kept to a strict minimum.

#### **AGING**

The malolactic fermentations in barrel are followed by aging in carefully selected French fûts and barriques, of which 60% are new, two-thirds Tronçais oak and one third Allier and Vosges, blonde to medium toast. Wines kept in wood for period of 22 months, racking them only once. Same vinification and care as Il Caberlot, but bottled in 750ml and aged in bottle for 6 months.
