

#### TASTING NOTES

Amber colored with gold reflections. Notes of raisins and vanilla on the nose. Bitter almonds and raisins on the palate, full body and long finish.

## Florio

### Fine Marsala Dry

COUNTRY	ABV	APPELLATION
Italy	18%	DOC Marsala
REGION	VARIETALS	
Sicily	80% Grillo, 20% Catarratto	

#### WINERY

The Duca di Salaparuta Group, gathered together by the Reina family, consists of three historic wine brands (Duca di Salaparuta, Corvo, and Florio) and today constitutes the largest private wine group in Sicily. Founded in 1833 by Vincenzo Florio, the Florio Winery in Marsala looks out towards the bright sea of western, or "occidental," Sicily. Made from the Trapani area, Grillo is a vine rich in history with characteristics that have given it the lead role in Marsala production. Marsala has been produced for more than 200 years, a famous Italian fortified wine named after the Sicilian city it belongs to. The birth of Marsala dates back to the late 1700s when John Woodhouse, a famous English merchant, arrived on the island and was "conquered" by wine, bringing back 60 casks. To keep the wine good over the course of his journey, he added brandy, and thus, Marsala was born. A consequence of the Continental Blockade in 1807, an embargo against British trade by Napoleon Bonaparte, the Marsala trade gained favor, and many English traders landed in Sicily to produce the famous wine. Vincenzo Florio himself founded his cellar in 1833, which over the years has become a predominant reference for the production of Marsala.

Currently, the Florio cellars house around 80% of Italy's production of the real Marsala, the basis of which starts almost exclusively from the Grillo grape. In the Trapani area, located on the coastline of western Sicily, are vineyards set in the sunny countryside chosen for their hillside position near the sea. After careful selection of the bunches in the field, the grapes arrive in the cellar where they are fermented in concrete tanks. At the end of fermentation, the fortification — or as Florio calls it, the "falling in love" — between alcohol and wine takes place. Using micro-oxygenation techniques, The Florio Winery contains varied kinds of oak that add personality and color to the maturing Marsala. Unexpected and original, it's space, time, and oxygen that breathe life into the rich complexity of Florio wines.

#### CULTIVATION

Typical Marsala bush-trained vines.

#### VINIFICATION

Pressing of the grapes with a high sugar content. Fermentation at a controlled temperature and blend of the resulting wine with fortified must, cooked must, and wine-brandy.

#### AGING

Aged for almost 3 years in casks and oak barrels of different volumes.
